

May need to be
reordered after slicing
in each row. Also,
should be possible to
avoid this, but
may be even
harder

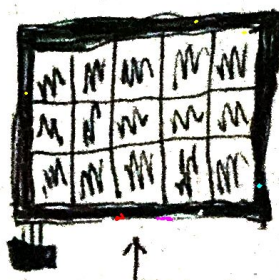

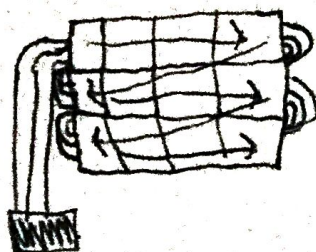

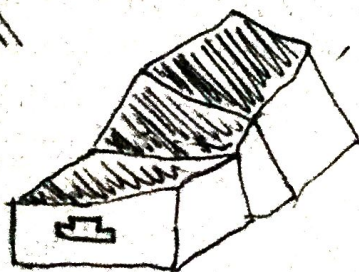

Black bottoms should
be printed

All cubes have slots, cubes are hollow underneath

Drawn to show wire flow, this
needs to be enclosed on all sides
but still hollow

Face frame design
parts will be glued
together

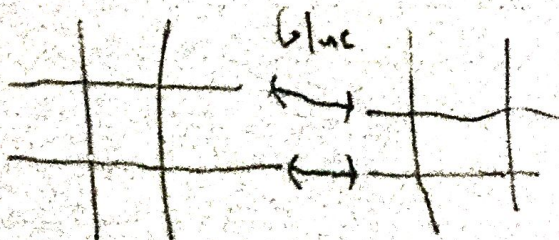

Wires run along black
frame

Measure print area v ledstrip length

stack at bottom to feed
wires on top to next row

Print thin white layer to be placed on
top, same size as sections
